

# CDN NETWORK DEFENDER

POWERED BY  
**CELERIUM**

## WHAT?

100% automated and intelligent solution that stops cyber threats in real-time

## HOW?

The patented Decision Engine technology consumes a data feed from the firewall, automatically scores each connection using a blend of proprietary analytics and over 80 threat feeds, then automatically updates the firewall's block list to block high risk connections.

No New Hardware  
Required

No Software to Install  
(100% SaaS)

No Agents or Analysts  
(100% Automated)

**How Long Does It Take?**

About 15-30 minutes

**How Often Does It Reoptimize?**

Every 10-15 minutes

**What Does It Cost?**

Please contact us for our  
straight-forward pricing

**How Do I Know It Works?**

Regular reporting shows the threats  
identified and blocked.

**CONTACT US TO SCHEDULE A DEMO**

Automatically defend against cyber threats... *effortlessly*
